# PROGRAM REVIEWS

**Dr Richard WANG, BDS (JCU)**

Graduate Program 2018  
Now Partner Dentist of Northwest Dental

*'I'm Dr. Richard from Experteeth Dental, and I'm in my 7th year with the company, currently serving as the principal dentist for the Tasmania section. I've had the privilege of working across various Experteeth clinics, including Coona, Narra, Chatswood, and Eastwood, and my journey has been incredible. Throughout my time here, I've expanded my knowledge significantly, placing over 150 implants, working on over 150 Invisalign cases, and regularly using Cerec restorations.'*

*Experteeth has provided essential support with a large patient base, great mentorship, and a positive work culture—things hard to find in many clinics. The freedom to manage clinics like Coonabarabran, Narrabri, and Deloraine has been invaluable. My time in urban areas like Chatswood and Eastwood taught me to adapt to different environments. Experteeth's growth reflects its excellence, offering flexibility to meet personal and professional needs.'*

*'My growth as a clinician has greatly accelerated since joining Experteeth. In Narrabri, the steady patient flow and easygoing patient base make for an interesting variety of treatments and weekly challenges. We also have a fun group of dentists who meet regularly.'*

*Experteeth has a system that allows dentists to seek advice on challenging cases from over 20 colleagues. The fortnightly online meetings provide opportunities to learn (e.g., communication, endo, perio, implants) and socialize. For example, the implant lecture series culminated in a hands-on experience with Dr. Hong Chang, which was invaluable and free of charge.'*

**Dr William HONG, DDS (Melb)**

Graduate Program 2020  
Now Partner Dentist in Canberra

*'As a 2023 graduate, working at Narrabri Dental Care in rural NSW has been a fulfilling journey. The close-knit team fosters ongoing case discussions, offering invaluable learning opportunities to refine clinical skills and grow confidence in treating diverse patient needs. In Experteeth, I was given unparalleled mentorship and hands-on experience in a supportive and collaborative environment. I had the privilege of being mentored by Dr. Hong Chang, whose expert guidance helped me navigate complex implant procedures. Experteeth's focus on mentorship, combined with the variety of cases and patient care in a rural setting, has provided me with a strong foundation for my dental career.'*

*For new grads, Experteeth offers the ideal opportunity to build confidence, gain real-world experience, and develop lasting professional skills in a dynamic environment.'*

**Dr George XU, BSc (Hons)**

Graduate Program 2024

*'I'm Dr. Selena from Experteeth Dental. I joined last year as a new graduate and currently work within the Victoria group. Since starting, I've received excellent mentorship, expanded my clinical knowledge, and gained confidence in my skills. My supportive colleagues constantly encourage me to learn and try new things, which has helped me grow quickly.'*

*The graduate program has been a valuable part of my journey, with fortnightly meetings covering clinical topics and hands-on sessions that allow us to apply what we learn. Most clinics are equipped with digital technology like scanners, CEREC one-day crowns, OPG, and CBCT—tools I really enjoy using. Experteeth has provided the ideal environment to build a strong foundation for my dental career.'*

**Dr Selena LIN, DDS (Melb)**
